

Sahil Bhanushali

Node.js Backend Developer

+91 7041872737 | bhanushalisahil.dev@gmail.com | linkedin | github | sahilxdev

SUMMARY

Backend developer focused on Node.js and Express building REST APIs, JWT auth systems, and schemas across MongoDB, MySQL, and PostgreSQL. Have shipped real-time features with Socket.io. Also work in React/Next.js when a project calls for it

TECHNICAL SKILLS

Backend: Node.js, Express.js, REST API, JWT Authentication, Socket.io, Redis, Bull (job queues)

Databases & ORMs: MongoDB, MySQL, PostgreSQL, Mongoose, Prisma ORM

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), TailwindCSS

Tools: Git, GitHub, Postman, Linux

EXPERIENCE

RND Technosoft

Software Developer

Feb 2026 – Present

Vapi, Gujarat

- Built a QR-based tracking platform: QR tags get printed and stuck on cars, bikes, and other items, and when someone scans a lost item's tag, the platform connects them to the owner through a masked call using **Fonada's** API, without ever showing the owner's real number
- Integrated **Shiprocket** API for order creation, label generation, and shipment tracking, exposed through internal REST endpoints
- Built a full ERP system for a manufacturing client that produces adhesive tape – covering inventory, production orders, and sales reporting, using MySQL
- Currently building a management platform for an NGO, handling blood donation requests, tracking item donations, and running an online store for homemade products

Freelance – React Js

Ghar Grocer

Jun 2025 – Jan 2026

Remote

- Built the React frontend for Ghar Grocer, a grocery ordering platform built for a client to serve local customers in Vapi
- Designed the database schema for the platform; the backend API was built separately in Laravel by another developer on the project

itsme Dezino

Web Developer

Jan 2025 – Jun 2025

Thane, Mumbai

- Built an internal task management tool for the team to assign and track work
- Built and delivered multiple client websites, handling frontend and backend work as needed

Niket Communications and Security Systems

Junior Developer

Sep 2023 – Aug 2024

Vapi, Gujarat

- Built a Pricebook module within SuiteCRM to centralize pricing logic across client accounts
- Built an AMC contract renewal scheduler that flags expiring contracts and triggers renewal workflows
- Built a real-time internal task workflow system with desktop push notifications

PROJECTS

Society Management Software |

- Built a society management platform for a builder to manage all of their projects from one place instead of handling each one separately
- Covers guard/security staff, internal staff management, and vendor management across every project the builder runs

EDUCATION

Laxmi Institute of Technology, Sarigam (GTU)

Bachelor of Engineering, Computer Science (CGPA: 7.61/10)

Vapi, Gujarat

Jun 2022 – May 2025

Government Polytechnic Daman (GTU)

Diploma in Computer Science (CGPA: 6.6/10)

Daman

Jun 2019 – Sep 2022
